Office Action Summary	Application No. 10/685,724	Applicant(s) WARE ET AL.	
	Examiner Manuel Mendez	Art Unit 3763	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. **Claims 1-15**, drawn to a medical fluid flow system having medical fluid therapy machine, a controller, a first pump and a second pump, and an operator interface, classified in class 604, subclass 65.
- II. **Claims 16-23**, drawn to an operator interface having a display device and a processor, classified in class 604, subclass 67.
- III. **Claims 24-37**, drawn to a therapy method comprising the steps of:
(a) establishing a communication link between a machine for performing a medical fluid therapy and at least one remote pump controller, (b) using the link to synchronize operation of at least one pump housed integrally with the machine with at least one pump located remotely from the machine, (c) enabling an operator to enter a net fluid transfer amount, and (d) controlling the pumps to substantially achieve the entered amount, classified in class 128, subclass 903.
- IV. **Claims 38-45**, drawn to a method comprising the steps of configuring a machine to perform the equation: $\text{filtrate pump rate} = \text{total input rate} - \text{total output rate} + \text{prescribed net loss rate}$, classified in class 604, subclass 500.
- V. **Claims 46-49**, drawn to a renal failure therapy method comprising the steps of pumping blood through a blood circuit, infusing citrate as an

anticoagulant, and controlling the citrate flowrate based on the blood flow rate automatically so that the flow rates are synchronized, classified in class 604, subclass 508.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, inventions I and II have separate utility in view of the structural differences disclosed for groups I and II. See MPEP § 806.05(d).

Inventions III, IV, and V are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions and different effects.

Inventions (I, II) and (III, IV, and V) are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the processes disclosed in groups III, IV, V are not structurally limited to the systems disclosed in Groups I and II, and therefore, can be practiced in materially different systems.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Manuel Mendez whose telephone number is 703-308-2221. The examiner can normally be reached on 0730-1800 hrs.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Brian Casler can be reached on 703-308-3552. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
